Professional Summary

Computer Science and Engineering graduate specializing in Artificial Intelligence and Machine Learning with hands-on experience developing and deploying full-stack MERN applications, REST APIs, and AI-powered software solutions. Proficient in Java, JavaScript, React.js, Node.js, Express.js, MongoDB, SQL, and Generative AI technologies with a strong interest in building scalable and user-centric applications.

Target Roles: Software Engineer | Full Stack Developer | MERN Stack Developer | Backend Developer

Core Focus: Full Stack Development | MERN Stack | REST APIs | Database Design | AI Applications

Education

AMC Engineering College, Bangalore, India

B.E. in Computer Science and Engineering (Artificial Intelligence and Machine Learning)

2022–2026

CGPA: 8.3/10

Technical Skills

Languages: Java, JavaScript, SQL, HTML5, CSS3

Frontend: React.js, React Hooks, Responsive Web Design

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MongoDB Atlas, SQL

AI and GenAI Tools: Generative AI, AssemblyAI, OpenRouter AI

Tools: Git, GitHub, VS Code, npm, Vercel, Render

Projects

Food Order Platform – AI-Powered Food Ordering System

GitHub | Live Demo

- Developed a full-stack MERN food ordering platform with restaurant discovery, menu browsing, cart management, and ordering features.
- Integrated Generative AI-powered food recommendations and intelligent search features while developing REST APIs using Node.js, Express.js, and MongoDB Atlas.
- Designed a responsive user interface and optimized application performance to provide a seamless ordering experience across devices.

Expense Tracker Pro – Personal Finance Management Platform

GitHub | Live Demo

- Built a full-stack MERN application for real-time tracking and management of income and expense transactions.
- Implemented CRUD operations, REST APIs, responsive dashboards, and MongoDB Atlas integration.
- Developed analytics features and data visualization components to help users monitor spending patterns and financial activities.

MindForge AI – AI-Powered Learning Assistant

GitHub | Live Demo

- Developed an AI-powered learning platform that converts audio into transcripts, summaries, key points, and quizzes.
- Integrated AssemblyAI speech-to-text and Generative AI models for automated content understanding and learning resource generation.
- Built scalable backend services using Node.js, Express.js, and MongoDB Atlas for efficient session management and content processing.

Professional Experience

MindMatrix Technologies

Bengaluru, India

Android Application Development Intern

- Developed Android applications using modern software development practices and AI-assisted workflows.
- Collaborated on application design, testing, debugging, and deployment activities.
- Gained practical experience in software development lifecycle, teamwork, and delivering user-focused applications.

Certifications

- Android Application Development Internship Certificate – MindMatrix Technologies
- SQL Certification – Infosys Springboard
